KROH BROS. Nurseries

P. O. BOX 536 LOVELAND, COLORADO

THORNLESS HONEYLOCUST

This and the patented selections are recommended as the outstanding trees for general planting.

CLUMP BIRCH

This multi-stem version of the European White Birch is very desirable and effective in home plantings.

SCHWEDLER MAPLE

A beautiful asset to every landscape planting

Shade Trees

Pages 12-15

Both Beauty and Comfort are Gained by Planting Trees

FLOWERING CRABS—Our Specialty

HOPA

Most popular Flowering Crab—is well-known for its striking rosy pink flowers, small bright red fruit, bronze-tinged foliage and hardiness.

Kroh Bros. Nurseries

**Is one of the best equipped to serve your needs in the
Rocky Mountain Region**

Descriptive catalog to help guide your selections in plants. Pages 2 thru 28 giving materials available for the Spring dormant season planting and Pages 29 to 39 covering our "Plant 'Em Growing" container established plants.

Most complete selection with thousands of our "Plant 'Em Growing" plants in full leaf and growth neatly arranged for your enjoyment and convenient selection for Summer planting.

Easy access and prompt service for customers who come to the nursery.

Orders filled efficiently for shipping.

Excellent accommodations for housing our office, warehouse and storage.

Diversified stock for complete landscape planting as well as many items for the gardener who plants incidental items from time to time.

We are always willing to assist you with your Landscape Planning arrangement to the extent of our practical experience. Landscape projects should be worked out well in advance of the Spring Planting rush to avoid disappointment. No additional charge is made for this service.

Our New Retail Guarantee

All nursery stock is unconditionally guaranteed to be true to name, and free from injurious insects, pests and disease as certified by State inspection, and to be delivered in good viable condition; any proving otherwise with claim made immediately on receipt of stock, will be replaced without charge, or purchase price will be refunded, but no greater liability will be assumed.

After our high quality nursery stock is delivered in good condition the future progress thereof is beyond our control; with future results depending a great deal on the care given and environment. We have confidence in the successful continued growth of our stock if promptly and properly planted and given reasonable care; therefore, we shall replace **ONCE ONLY** without charge f.o.b. the nursery, any item sold at regular retail that fails to survive the first growing season, **PROVIDED** we are notified of items lost by **NOVEMBER 1st**.

No replacement will be considered for stock given abuse or neglect, or losses caused by winter or storm damage, on losses when account has past due unpaid balance or on losses not reported by **NOVEMBER 1st**.

The above guarantee does not cover any service charges involved. Our regular charge will be made for planting, etc. of the replacements, if our services are requested.

Terms of Sale

Prices are cash with order; C.O.D. orders must be accompanied by at least one-fourth cash; money orders and checks are recommended for remittance; orders with coins and currency should be registered.

Credit! Charge Accounts and Time Payment Plans must be arranged and accepted by our office prior to delivery of merchandise. To cover bookkeeping and billings costs a Carrying Charge will be added to all accounts running over 60 days. Carrying Charges will be $1\frac{1}{2}\%$ per month on the unpaid balance until paid in full.

Packing Charges: No charge for packing dormant bare root stock. By necessity we must charge 25c per 1 gal. container and 50c per 5 gal. container to help cover the cost of crating and packing to assure arrival in good condition.

Shipping Charges: Quotation for the majority of dormant items (Pages 2 thru 27) in this catalog are based f.o.b. Loveland except as otherwise noted. We feel that this is the fairest method; thereby eliminating the alternative of offering lighter cheaper grades to offset delivered prices. Bulbs, Roses, Small Fruits, Mums, Perennials being more uniform in size are quoted postpaid on orders of \$5.00 or more. Such items as Hedge plants, Shrubs and Fruit trees in smaller sizes not indicated Postpaid that can be handled within parcel post regulation, may be shipped parcel post, but please add 15% to apply on postage.

Railway Express or reliable Fast Motor Freight is recommended as most satisfactory in a large number of cases. Shade trees, Balled evergreens and Container established stock are shipped only by Express or Motor Freight with freight charges payable for exact amount on arrival.

Shipping Season: For dormant plants, between March 15 and May 15 for spring. Oct. 15 to Dec. 1st for fall planting. **Plant 'Em Growing** container established plants shipped March 15 to Dec. 1st.

FRUIT TREES and PLANTS

We doubt whether there is another section that has such a range of climatic conditions as the Rocky Mountain Plains region. Exposure and altitude are more varying factors than latitude. Our mountain range, as a rule, affords zones of protection along the base of the mountains and within sheltered valleys where fruit growing more readily expands to commercial proportions. In many parts of this section, existing plants or fruits have already pointed out what will or will not do well in a certain area. In all cases soil and watering should be favorable, and windbreaks planted where necessary.

Apples

One of the most useful trees in the world. May be planted as an ornamental shade tree from which enjoyable fruit is picked, or in several varieties making up the home orchard.

Summer, Fall and Winter ripening varieties should all be included in the well rounded home orchard, with winter apples predominating. The Delicious and Jonathan are not quite as winter hardy for exposed higher altitude plantings.

Winter Varieties

DARK RED DELICIOUS. Often referred to as Double red. A much improved Delicious, turning completely red before it is ripe. Size 2, 3, 4.

JONATHAN. Medium size of finest quality, bright red, fine flavor; moderate grower. Size 1, 2, 3, 4.

HARALSON. A Minnesota variety that is a winter commercial variety in this section. Early bearer, fruit fine grained and tender. Size 2, 3, 4.

McINTOSH. Deep red, good size with crisp, tender, snow-white flesh. Has extremely pleasing flavor. Above average in hardness and dependability. Size 1, 2, 3, 4.

YELLOW DELICIOUS. This beautiful yellow apple is a bright golden yellow, sweetly acid flavor, good bearer, beginning at early age. Size 2, 3, 4.

Summer Varieties

RED JUNE. August. Medium size, deep red; good flavor; productive. Size 1, 2, 3, 4.

YELLOW TRANSPARENT. Ripens in August. A splendid early cooking and eating apple; pale yellow fruit. Hardy, bears young. Size 2, 3, 4.

WHITNEY CRAB. August. Hardy, good bearer; fruit small to medium, striped red and green, fine for eating and canning, sweet and crisp. Size 1, 2, 3, 4.

Fall Varieties

JOYCE. New addition to our list.

Bright red, good sized apples with crisp, juicy white flesh and delightful flavor produced freely on vigorous sturdy broad tree that has shown exceptional winter hardness and production at the Cheyenne Hort. Station. Size 1, 2, 3, 4.

WEALTHY. September. Fine, reliable bearer of large red striped, tender, juicy, slightly sub-acid fruit. One of the finest and hardest apples. Size 2, 3, 4.

DOLGA CRAB. Has very brilliant red fruit of small size, borne freely.

ONE-TREE APPLE ORCHARD

Grafting skill converts just one tree into an "ORCHARD" with up to six varieties on one tree. In building our "ONE TREE APPLE ORCHARD" we use a hardy crabapple trunk to which is grafted the following varieties, Red and Yellow Delicious, Red June, Jonathan, Jelfries and McIntosh. The sets of varieties are not classified on the individual tree

but each tree will have the designated number of the above varieties.

In ordering please state the tree size and number of varieties.

No. Varieties	4-5'	5-6'	6-8'	1" cal.
4 Variety	3.00	3.75	4.25	5.00
5 Variety	3.75	4.25	5.00	5.75
6 Variety	4.75	5.25	6.25	

Cherries

Cherries bear fruit very soon after planting and are very desirable for pies and canning. The sweet cherries lack winter hardiness on eastern slope unless planted where well protected. The planting of a Black Tartarian with the other sweets will help in pollinizing.

SOUR CHERRIES

✓ ENGLISH MORELLO. Ripens late July. Fruit large, nearly black, very attractive. Size 3, 4, 5, 6.

✓ MONTMORENCY. The best all around sour cherry grown. Ripens mid-July; large bright red. Size 1 thru 6.

✓ METEOR. Large bright red fruit, exceptional quality on a semi-dwarf tree. Mid July. Size 4, 5, 6.

✓ EARLY RICHMOND. Ripens about July 1st; medium sized, red. Size 4, 5, 6.

No. 6	5/16-7/16 in.

SWEET CHERRIES

✓ BING Well known black sweet with delicious flavor. Tree is quite tender on the eastern slope. Size 2, 3, 4, 5, 6.

✓ BLACK TARTARIAN. Black sweet, that makes a good pollinizer for other sweet cherries. Size 2, 3, 4, 5.

✓ KANSAS SWEET. Good dark sweet with a little more winter hardiness to the tree. (Container stock only)

✓ YELLOW GLASS. Hardest of the yellow cherries. Size 3, 4, 5, 6.

Plums

American Type

KAHINTA. Medium large red fruit; good flavor, very productive. Size 3, 4, 5.

OPATA. Cherry-Plum. Bearing very young with excellent flavor and very useful for jams and jellies. Fruit is purplish red with green flesh. Size 4, 5.

SAPA. Cherry-Plum. Fruit purple red, flavor. Size 3, 4, 5.

SUPERIOR. Vigorous tree furnishing large red fruit with yellow flesh, fine flavor. Size 3, 4, 5.

European Type

GREEN GAGE. Very gratifying in rich mild delicious sweet flavor. Medium to large. August. Size 2, 3, 4, 5.

PEACH PRUNE. Large roundish fruit, red skin dotted with a blue bloom; Flesh greenish yellow, tinged red at maturity, having a rich sweet, brisk flavor. Size 3, 4, 5.

STANLEY PRUNE. We recommend it as the top prune. Fruit is large deep bluish purple, firm and sweet, excellent quality fresh or canned. Size 2, 3, 4, 5.

✓ YAKIMA. A dull reddish purple plum of exceptionally large size, fine flavor. Size, quality, flavor of the fresh fruit is a pleasant surprise for those planting this fine variety. Size 3, 4, 5.

Peaches Pears

Peaches, like sweet cherries are generally not recommended northly on the eastern slope of the Rockies and Plains. However many a back yard or home orchard tree in Eastern Colorado has on occasion borne lovely crops of this fruit. Western Slope districts are of course nationally famous for Peaches and other more tender tree fruits.

ELBERTA. The greatest commercial peach on the market today. Fruit large, yellow with red cheek, juicy and highly flavored. Size 2.

HALEHAVEN. Highly popular recent introduction. Produces firm large fruit, yellow with generous red shading. Excellent flavor. Size 2.

POLLY. White freestone having more cold resistance than the average variety. Has luscious flavor, juicy but firm. Late August. Size 3.

BARTLETT PEAR. The leading late summer pear. Large, yellow with bluish, juicy, sweet, high quality.

Size 1, 2, 3, 4, and extra large.
1¼-1½" cal. \$4.65; 1½-1¾" cal. \$5.45

No. 5	7/16-9/16"	2½-4 ft.	1.95

SMALL FRUITS

We wish to call your attention to the usefulness of Small Fruits in the garden. In addition to their unequalled value as delightfully flavored sauce, jellies, and preserves their usefulness as ornamental vines and shrubs should not be overlooked in planning the home garden. Even Strawberries make a useful and attractive low-growing border around perennial and flower beds.

Grapes

Fredonia

Plump clusters of grapes ripened on your own vines taste twice as good. Double value is often gained for vine covering of fences, arbors, and trellises.

BETA. Where a rugged grape is required, this deserves very serious consideration. A cross between Concord and wild grape will adequately support the home needs for jelly and juices. Hardy without protection. Ideal for arbors and fences.

CACO. A new red grape among the earlier ripening varieties. Bunches are compact and of good size and form. Pleasant sweet flavor.

CONCORD. The widely planted blue-black grape.

FREDONIA. A new very early delicious black grape, with large berries and bunches. Ripens two-weeks ahead of Concord.

MOORES EARLY. A worthy new addition to the blue black large fruited varieties. Ripens early to miss frost danger.

NIAGARA. Productive "white" variety. Large berries mature to light greenish-yellow; has sweet mellow flavor.

All vines are heavily rooted 2-year No. 1 size

THORNLESS BOYSENBERRY

The sensational berry, large size and wonderful flavor; purple color. Canes require winter protection under exposed conditions. (Plants guaranteed to be in good live condition on arrival only.)

Price per 4, 90c; per 12, \$2.50;
per 25, \$4.50

Currants

NEW RED LAKE CURRANT. Excellent quality, large red berries in long well-filled clusters. A Minnesota introduction that has become the leading garden variety.

2 yr. No. 1	Ea.	Per. 3	Per 10
Postage Paid.			
New Red Lake	.80	2.25	7.25

Gooseberries

Currants, Gooseberries, and or Raspberries planted as a border to separate the garden from the remaining yard area will furnish an attractive informal hedge and supply delightful fruit.

PIXWELL. Fine new variety from the north. Very hardy, vigorous, heavy yielding. Berries large light green maturing to pink. Name Pixwell derived from long stems for easy reach and sparse thorns. Colorful autumn foliage.

2 yr. No. 1	Ea.	Per. 3	Per 10
Postage Paid.			
Pixwell	1.30	3.75	12.00

Raspberries

We recommend covering Raspberry canes for winter protection on Eastern slope and plains. Your efforts will be well rewarded in additional delicious fruit.

BLACK CUMBERLAND. One of the most reliable and widely planted, large juicy fruit.

LATHAM. A widely planted red raspberry. Prolific, strong, mosaic-resistant canes; firm, very large berries.

SEPTEMBER. Everbearing. New origination of Dr. Yeoger at the University of New Hampshire. Healthy, hardy, vigorous grower and heavy producer of large firm bright red berries on winter protected old canes. Heavy early fall crop produced on new canes.

Hardy Strawberries

The exceptional hardiness inherited from the Native Strawberries used by the USDA to develop Radiance and Arapahoe has expanded the home garden strawberry enjoyment and popularity tremendously in the arid Great Plains and Mountain Areas.

Radiance Cheyenne Everbearer

ARAPAHOE USDA. 1954 Introduction.

A robust vigorous plant; while lacking some of the exceptional winter hardiness of Radiance, has not shown damage here without mulching. Its reluctance to set runner plants make Arapahoe desirable for individual hill culture. Produces large broad conical firm bright red sub-acid delightfully flavored berries in abundance. Sustained production June till frost.

PRICED; per 25, \$3.25; per 50, \$6.00
per 100, \$10.50; per 200, \$19.50

RADIANCE U.S.D.A. 1954 Introduction.

The first everbearing strawberry of the Cheyenne series. The hardest everbearer ever tested in the high plains. Plants are medium size, vigorous, dark green, and set average amount of runner plants. Produces abundance of medium to large conical deep red sub-acid to sweet berries with highly gratifying delicious flavor and aroma inherited from its native parentage. Sustained production, June till frost.

PRICED: per 25, \$2.25; per 50, \$4.25
per 100, \$7.75; per 200, \$14.50

ORNAMENTAL SHRUBS

For Flowers and Foliage

Practically every family has pride in the appearance of the home grounds. Selection of trees shrubs, evergreens, vines and flowering plants that are adapted and their use in an orderly manner makes it possible for practically everyone to have the pleasure of a home with attractive surroundings.

Whether it be additions to the home landscape by degrees or complete plantings, there is no investment that can be made in home improvement that is as reasonable in proportion. Structural improvement and home furnishing of course are essential, but the investment for landscaping is the only one in which the per dollar value will increase instead of depreciate.

The planting size of the different varieties listed here are described by height. We wish to stress the fact that height is being given for stock that has been transplanted one or more times and has a heavy, well developed root system and well branched top. This stock should not be confused with light grades of easily propagated stock that is often featured by mail at low prices.

Numbers following names represent approximate height at maturity under average normal conditions. Shrubs are not quoted Postpaid.

ALMOND, Double Pink Flowering. 5-6 ft. Branches thickly studded with double pink rose-like blossoms in spring before leaves appear. Does best in protected location. 2-3 ft. each \$1.65

ALTHEA, Rose of Sharon. 8-10 ft. Holly-hock like blossoms on a well foliated shrub blooming Aug. and Sept. Not recommended above 5000 ft.

ARDENS,—double purple

ANEMONE—double pink

BOULE DE FEU—double red

JEANNE DE ARC—double white

2-3 ft. each \$1.65

BARBERRY, Crimson Pygmy, 12-18".

Miniature form of the popular red leaf barberry. Charming, extremely dense deep red foliage. 9-12 in. ea. \$1.90

BARBERRY, Mentorensis, 4-5 ft. Semi evergreen upright shrub carrying heavy thick, dark green foliage changing with frost to pleasing autumn shades. Leaves continue to adhere nearly all winter. Gives air of refined simplicity and beauty to a planting.

15-18 in. ea. \$1.50; 18-24 in. ea. \$1.85; 2-3 ft. ea. \$2.25

BARBERRY, Thunbergi "Greenleaf" 4 ft.

Dwarf shrub used extensively in foundation planting, groups and hedges. Full branching habits; rich green foliage turning red in autumn; red berries.

15-8 in. ea. \$1.10; 18-24 in. ea. \$1.35

2-3 ft. ea. \$1.65

BARBERRY, Red Leaf. 4 ft. The same as Barberry Thunbergi except for colorful bronzy red foliage all summer long. Locate in sunlight for best color.

15-18 in. ea. \$1.35; 18-24 in. ea. \$1.65

2-3 ft. ea. \$2.10

BUFFALOBERRY, Shepherdia Argentea,

8-12 ft. A large shapely spiny shrub that adds foliage variation to a planting with its bright silvery gray foliage. Very hardy. 2-3 ft. ea. \$1.55; 3-4 ft. ea. \$1.85

BUTTERFLY BUSH, Buddleia. Summer

Lilac 4-6 ft. Usually kills to ground, but makes quick, bushy well branched growth, producing large spikes of fragrant lilac-like bloom, July on. Blooms first year, strong plants.

DUBONNET—most popular dark wine.

EMPIRE BLUE—Lilac-toned Aster-blue.

ROYAL RED—rich dark royal purple.

WHITE CLOUD—Beautiful white.

Each 95c; 3 for \$2.75

CARAGANA, Arborescens, "Siberian Pea

"Tree." 10-12 ft. Very hardy tall shrub for specimens, screens or hedges; attractive locust like foliage, green stems. Small yellow pea shaped blooms May—June. 2-3 ft. ea. \$1.15;

3-4 ft. ea. \$1.50; 4-5 ft. ea. \$1.95

Butterfly Bush

CARAGANA, Microphylla, Little Leaf
Pea Shrub, 8-10 ft. Similar to Arborescens, very hardy, smaller leaved, more densely branched. Fine for hedges and screens. 2-3 ft. ea. \$1.20; 3-4 ft. ea. \$1.50
4-5 ft. ea. \$1.95

CARAGANA, Dwarf Pygmaea, 3 ft.
Bushy shrub with minute dark green foliage, showy orange pea-shaped flowers in May. Very hardy.
12-15 in. ea. \$1.10; 15-18 in. ea. \$1.25
18-24 in. ea. \$1.45

CARYOPTERIS (Blue Mist Spirea)
20-30 in. A real contribution to the meager list of late-flowering shrubs, Covered with small powder-blue fringed flowers in numerous clusters on a round mound like plant from August until frost. Very hardy. 12-15 in. ea. \$1.10
15-18 in. ea. \$1.25; 18-24 in. ea. \$1.55

COTONEASTER, Acutifolia, 6 ft. Very hardy shrub assuming shapely proportion. Foliage rich dark green, glossy on upper side, medium size, fairly dense. Beautiful autumn color; profusion of blue-black berries in fall. Sun or shade.
18-24 in. ea. \$1.15; 10 for \$10.00
2-3 ft. ea. \$1.50; 3-4 ft. ea. \$1.95

COTONEASTER, Divaricata, Red berried
Cotoneaster. Similar to the Acutifolia except it produces red fruit in the fall along with very bright fall foliage color.
18-24 in. ea. \$2.25; 2-3 ft. ea. \$2.50

CURRENT, Alpine, 3 to 4 ft. Hardy dwarf bright green foliage shrub developing neat compact shape. Adapted to sun or shade. 18-24 in. ea. \$1.95

DOGWOOD, Colo. Native Red Stem, 5-7 ft. Shapely shrub, medium to large foliage; white flower clusters followed by white berries. Bright red branches liven the winter landscape. 2-3 ft. \$1.75
3-4 ft. ea. \$2.15; 4-5 ft. ea. \$2.45

DOGWOOD, Yellow Stem (Cornus Golden Twig) 6-8 ft. A striking yellow branched form of Dogwood. Its distinct yellow bark has fine winter effect.
2-3 ft. ea. \$1.75; 3-4 ft. ea. \$2.10

DEUTZIA, Pride of Rochester, 5-8 ft. An attractive arching branched shrub, double pink tinged white blooms. June-July. 18-24 in. ea. \$1.35; 2-3 ft. ea. \$1.65

EUONYMUS ALATUS COMPACTA 4-6 ft. Dwarf form of the poplar E. Alatus. Bark not as winged. Same beautiful fall color on densely foliated plant. One of the finest semi-dwarf shrubs.
18-24 in. ea. \$3.75

EUONYMUS, Alatus, Japanese Spindle Tree, 10-12 ft. Interesting winged corky bark. Yellow flowers May-June. Leaves turning brilliant crimson in autumn, scarlet fruit. 18-24 in. ea. \$2.65; 2-3 ft. ea. \$4.75

Spirea Van Houtte "Bridal Wreath"

EUONYMUS, Atropurpureus, Wahoo or Burning Bush, 10-12 ft. Especially attractive are the many bright red berries carried well into winter. Foliage attractive green in summer, turning rich fall color. 18-24 in. ea. \$1.40
2-3 ft. ea. \$1.85; 3-4 ft. ea. \$2.25

FLOWERING CHERRY, Prunus F. Mugsy, 6-8 ft. New selection from Morden Experiment Station. Very hardy slow growing finely branched shrub or miniature tree. The branches are completely covered with single bright cerise blooms that hold well, in early spring followed by attractive glossy green foliage, no fruit. Container stock only.
3-4 ft. ea. \$4.75

FLOWERING QUINCE, Cydonia Japonica, 5-6 ft. A selected strain, beautiful uniform scarlet flowers. Bush becomes blaze of color in spring before leaves mature. Blooms best following mild winter and spring in protected place.
2-3 ft. ea. \$1.65; 3-4 ft. ea. \$1.95

FORSYTHIA "Arnold Dwarf" 3-4 ft. A much smaller and more densely branched selection. Bright yellow flowers on arching branches in early Spring.
18-24 in. ea. \$1.80; 2-3 ft. ea. \$2.15

FORSYTHIA, Fortunei, Golden Bells, 6-8 ft. Upright arching branches bearing many early bright yellow flowers in April. Blossoms best following mild winter and spring in protected place.
2-3 ft. ea. \$1.75; 3-4 ft. ea. \$2.15
4-5 ft. ea. \$2.65

FORSYTHIA, Spectabilis, Showy Border
Forsythia 8-10 ft. Erect branches, excellent deep green foliage, cheerful display of rich golden yellow flowers.
2-3 ft. ea. \$1.75; 3-4 ft. ea. \$2.15
4-5 ft. ea. \$2.65

FORSYTHIA, Sieboldi Suspensa, Weeping Forsythia. 5-6 ft. Bright yellow blooms on very slender pendulous branches. For wall overhang or trellis. 2-3 ft. ea. \$1.75; 3-4 ft. ea. \$2.15

GINNALA MAPLE. 10-12 ft. Large shrub that may also be pruned to produce a dwarf tree with one or more trunks. Typical maple foliage turns a brilliant red in the fall. 3-4 ft. ea. \$2.70

GOLDEN ELDER. A large spreading bush with handsome yellow foliage. White flowers in June and July followed by black fruit in Aug. and Sept. 2-3 ft. ea. \$1.75; 3-4 ft. ea. \$2.15

HONEYSUCKLE, Clavey's Dwarf. 3-5 ft. A recently introduced hardy, compact addition to the popular honeysuckles. Small yellow flowers in May followed by red berries. 2-3 ft. ea. \$1.75

HONEYSUCKLE, Korolkowi, Blueleaf Honeysuckle. 8-10 ft. Broad blueleaf, beautiful foliage, pinkish white bloom, red berries. Very hardy. 2-3 ft. ea. \$1.95

Zabeli Honeysuckle

HONEYSUCKLE, Zabeli, True Red Honeysuckle. 8-10 ft. An improved honeysuckle with decided rose-crimson blossoms, which is in contrast with the pink shades of other honeysuckles. Blooms May-June followed by scarlet berries; very hardy. 2-3 ft. ea. \$1.45; 3-4 ft. ea. \$1.75

HYDRANGEA, A.G. 3-5 ft. Large clusters, snow-white flowers, July-Aug.; large foliage. Usually starts from ground each spring in this climate. Not recommended in strong alkaline soils. 2-3 ft. ea. \$1.65

HYDRANGEA P. G. 4-6 ft. Large trusses of showy double white flowers, blending into pink and bronze. July—October. Avoid planting in strong alkaline soils. 2-3 ft. ea. \$1.65

Hydrangea, A.G.

MOCKORANGE, Golden; 3-4 ft. Dwarf shrub covered with white sweet scented single flowers in May-June. Compact grower with yellow foliage.

CONTAINER STOCK ONLY

18-24 in. ea. \$4.20; 2-3 ft. ea. \$5.35

MOCKORANGE, Minn. Snowflake. 6-8 ft. An outstanding introduction very double sweet scented, very profuse bloomer. Graceful well branched shrub, holding its foliage better than most mockoranges.

2-3 ft. ea. \$1.65; 3-4 ft. ea. \$2.15

MOCKORANGE, Virginal. 6-8 ft. Medium grower, bearing many beautiful fragrant semi-double flowers over a long season from May on.

2-3 ft. ea. \$1.75; 3-4 ft. ea. \$2.15

NINEBARK, Aureas, Goldleaf Ninebark. 6-8 ft. The golden foliage adds color to shrub groupings or in borders. Sets small white flowers in clusters in late May-June. 3-4 ft. ea. \$1.80
4-5 ft. ea. \$2.10

NINEBARK, Dwarf. 4-5 ft. A medium low growing shrub giving a fine trim appearance; compact form; dense attractive green foliage. Neat white flower clusters, early June. 2-3 ft. ea. \$1.50
3-4 ft. ea. \$1.80.

PRIVET, Amur River. Chiefly used for trimmed hedges. Is satisfactory up to about 5,000 ft. See hedge plants.

POTENTILLA, Farreri. 3 ft. up. Also referred to as P. Goldrop. A new shrub that is a "find" among dwarf varieties. Trimly shaped bushes have fairly dense green finely divided foliage which is surmounted by a generous profusion of small bright golden yellow blossoms in June, continuing throughout the summer. Hardy; sun or shade.

12-15 in. ea. \$1.45; 15-18 in. ea. \$1.75
18-24 in. ea. \$1.95; 2-2½ ft. ea. \$2.25

POTENTILLA, Dahurica. 3 ft. up. Plant quite similar to Farreri except for having white blossoms. 15-18 in. ea. \$1.75
18-24 in. ea. \$1.95

PRUNUS CISTENA. Purple Leaf Plum. 5-7 ft. Very colorful shrub. Plum-like foliage is deep blood-red while forming, changing to bronzy green; small pink flowers in May. Adds variety and contrast. 18-24 in. ea. \$1.95

2-3 ft. ea. \$2.65; 3-4 ft. ea. \$3.45

4-5 ft. ea. \$4.15

Prunus Newport and **Prunus Thundercloud** (Purpleleaf Plums) are quoted under shade and Ornamental trees.

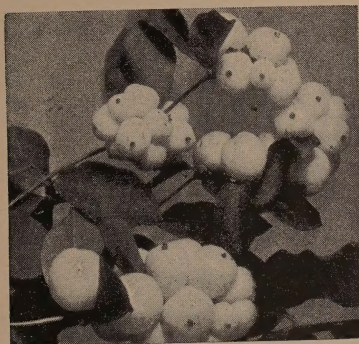

PRUNUS TRILOBA, Flowering Almond or **Flowering Plum.** 5-7 ft. Attractive grown as ornamental tree or shrub, decked with quantities of double rose-type pink blossoms just as new foliage appears in the spring.

18-24 in. ea. \$1.75; 2-3 ft. ea. \$2.25

3-4 ft. ea. \$2.95

PRUNUS TOMENTOSA, Nanking Cherry. Desirable neat branching shapely shrub heavily laden with bloom before dark green foliage appears. Bears red cherry-like fair size, good flavored fruit useful for preserves. 2-3 ft. ea. \$1.35

3-4 ft. ea. \$1.80; 4-5 ft. ea. \$2.25

Snowberry, White

SNOWBERRY, Red (Coralberry.) 4-5 ft. Attractive variation from the white Snowberry in that it has smaller red berries that cluster in ropes along the stems and with slightly darker foliage. 2-3 ft. ea. \$1.10; 3-4 ft. ea. \$1.45

SNOWBERRY. White (Racemosus.) 4-5 ft. Of fairly compact growth; attractive green foliage. Tiny pink flowers in June followed by large white berries remaining into winter.

18-24 in. ea. 90c; 2-3 ft. ea. \$1.10

3-4 ft. ea. \$1.35

SILVERBERRY, Eleagnus Argentea. 6-8 ft. Erect thornless shrub, reddish brown branches, beautiful soft silvery-gray foliage, small fragrant yellow flowers. 18-24 in. ea. \$1.50; 2-3 ft. ea. \$1.75

SPIREA Frobeli. 3 to 4 ft. summer blooming dwarf spirea with crimson pink flower clusters. 15-18 in. ea. 95c; 18-24 in. ea. \$1.25

SPIREA, Prunifolia. Double Bridal Wreath, 4-6 ft. Miniature double white blooms in profusion on a shapely plant makes this one of the outstanding Spireas. 18-24 in. ea. \$1.35; 2-3 ft. ea. \$1.65

SPIREA Van Houtte. 5 to 6 ft. Well known popular shrub, sometimes called "Bridal Wreath." Graceful habit of growth. A "fountain" of white flowers in late May.

18-24 in. ea. \$1.10; 2-3 ft. ea. \$1.35

3-4 ft. ea. \$1.75

SUMAC, Staghorn. 10-12 ft. Tall irregular caned shrub or small tree with large glossy foliage, flower greenish dense terminal panicles, clusters of crimson berries. Beautiful bright red fall foliage. 2-3 ft. ea. \$1.25

SUMAC, Smooth Glabra, 5-6 ft. An uncommon type that differs in its dwarf habit and very dark glossy foliage. Has red fruit clusters and rich red autumn foliage. 2-3 ft. ea. \$1.25

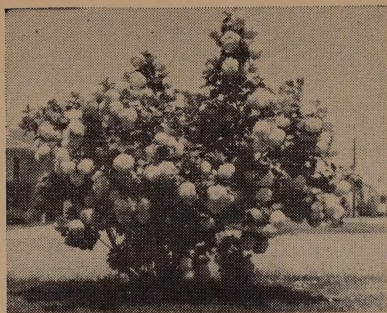

TAMARIX, Summer Glow. 10-15 ft. Has fine feathery silvery foliage; bright coral-pink flowers, June July. For best success, Tamarix should be cut back at least half when planting.

18-24 in. ea. \$1.50; 2-3 ft. ea. \$1.95

3-4 ft. ea. \$2.25

Viburnum Lantana

Snowball, Viburnum Opulus Sterile

VIBURNUM, Lantana. "Wayfaring Tree."

8-10 ft. Upright growing shrub with heavily veined rich green foliage. Heads of white flowers in June, followed by red and black berries.

18-24 in. ea. \$1.50; 2-3 ft. ea. 1.85

3-4 ft. ea. \$2.25

VIBURNUM OPULUS, High Bush Cran-

berry. 8-10 ft. Hardy shrub, dense attractive foliage, single white flower clusters in May followed by scarlet fruit hanging on until spring. 2-3 ft. ea. \$1.95

VIBURNUM OPULUS STERILE, Com-

mon Snowball. 8-10 ft. Well known shrub forming many balls of pure white flowers in May-June. 18-24 in. ea. \$1.65. 2-3 ft. ea. \$1.95; 3-4 ft. ea. \$2.35.

Lilacs

This class of shrubs is of great value for Western planting; they are hardy, drought resistant, and unexcelled during their blooming season for beauty.

COMMON PURPLE. 8-10 ft. The fine old familiar lavender purple.

18-24 in. ea. \$1.35; per 10 \$12.00

2-3 ft. ea. \$1.65; per 10 \$15.00

3-4 ft. ea. \$2.10; per 10 \$18.50

PERSIAN LILAC. Rothomagensis type.

8-10 ft. Flowers few days later than Common Lilac; color attractive lilac shade, rosy overcast. Medium size foliage and graceful habit of growth. Starts blooming young. One of the most satisfactory Lilacs.

18-24 in. ea. \$1.50; per 10 \$13.50

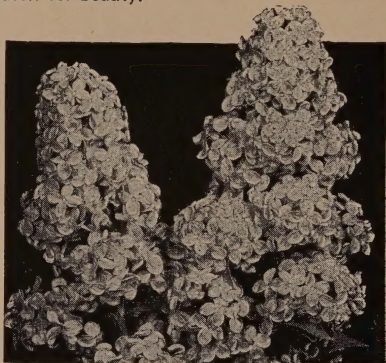

2-3 ft. ea. \$1.80; per 10 \$16.50

3-4 ft. ea. \$2.15; per 10 \$19.00

VILLOSA LILAC, Late Lilac. 6-8 ft.

Bushy, compact grower with large attractive rich green foliage, light lavender pink flower forming on new growth avoiding possible frost damage.

18-24 in. ea. \$1.50; 2-3 ft. ea. \$1.75

Lilac Syringa

FRENCH HYBRID LILACS

The Hybrid strains have added much in variety of color to the popular Lilac. Bushes similar to the Common Lilac but with decided difference and variation in color of bloom.

ALPHONSE LAVALLE. Large Trusses, double, deep lilac-color. Size 2, 3.

CHARLES X. Loose trusses of reddish purple flowers. Size 2.

CONGO. Single deep wine red blossoms. One of the best. Size 2, 3.

MME. LEMOINE. Double pure white trusses. Size 2.

LUDWIG SPAETH. Single, deep purple, large trusses on shapely plants. Size 2, 3.

MICHEL BUCKNER. Single, pink-lilac buds merging to blue-lilac as open. Size 2.

PRES. GREVY. Double beautiful pale blue. Blooming in large trusses. Size 1, 2.

Size 1: 3-4 ft. \$3.25; per 10 \$30.00

Size 2: 2-3 ft. \$2.65; per 10 \$25.00

Size 3: 18-24 in. \$1.95; per 10 \$18.00

An ideal gift for that someone that has everything, or that certain person that is so hard to buy for, because they can choose what they desire.

GIVE A

Hedging and Windbreak Plants

The following varieties of trees and shrubs are some of the most satisfactory for trimmed hedges, informal hedges, screens, borders, and windbreaks.

Trimmed hedges have plants spaced from 6 to 12 inches or more apart with 9 to 12 inches being most common. Hedging stock should be trimmed back severely ($\frac{1}{2}$ or more) when planted to induce thick growth at the bottom. For screen or borders, plants are usually spaced from 18 inches to several feet apart, depending on the variety and the effect desired.

Further description of the following varieties is noted in listing of large landscape sizes under trees and shrubs.

BARBERRY, Red Leaf. Same as Thunbergi, with colorful red leaves.

BARBERRY, Thunbergi. Low trimmed or informal hedge. Not so successful at higher altitudes or in strongly alkaline soils.

CARAGANA, Microphylla. Very hardy trimmed hedge 3 to 5 feet. Screens, border or windbreak.

CHINESE ELM. The use of Chinese Elm for windbreaks has exceeded that of any other deciduous variety in the plains area. Also used for quick 4 to 7 ft. trimmed hedge.

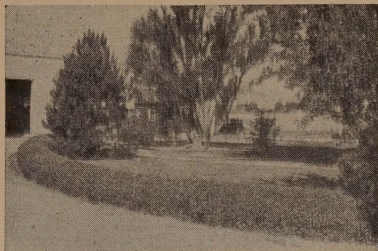

COTONEASTER, Acutifolia. Very hardy, dense, glossy trimmed hedges 2 to 4 feet or 5 to 7 feet screen border. Hardier than Privet for the higher exposed plains area.

EVERGREENS. The use of evergreens in windbreaks and as trimmed or informal hedges is becoming increasingly popular. Our Baby Evergreen and Plant 'Em Growing section quotes economical and suitable sizes.

HONEYSUCKLE, Zabeli. Fast growing, hardy dense trimmed hedge 3 to 6 feet, or informal screens 8 to 10 ft.

PRIVET, Amur River. Dense, rich green trimmed hedge 2 to 4 feet.

PRIVET, Lodense. A dwarf, dense 1 to 2 ft. hedge. Fine in somewhat sheltered areas.

A low trimmed hedge is very desirable to border property lines or to divide lawn area from driveways, back yard play or work areas to give an attractive barrier controlling foot traffic and wind blown debris.

RUSSIAN OLIVE. Windbreak; trimmed hedge. 4 to 6 ft. Tall screen or border.

SPIREA, Van Houtte. Beautiful white flowering informal hedge, screen or border.

PLANT A SPRUCE HEDGE

Given a few years to develop a trimmed Spruce hedge is unequaled as a durable attractive evergreen fence or screen.

Colorado Green Spruce in 1 gal. Cont.

9-15 in. 10 for \$19.50; 25 for \$45.00

100 for \$165.00; 200 for \$300.00

15-24 in. 10 for \$22.50; 25 for \$52.50

100 for \$195.00; 200 for \$375.00

PRICES OF HEDGES AND WINDBREAK PLANTS

SHADE and ORNAMENTAL TREES

Beauty and comfort, by climate control, are gained by planting trees. Modern insulation and air conditioning may give perfect control of the indoor living quarters; but more well chosen properly placed trees should be planted to improve our comfort and enjoyment of the outdoor living area, particularly in the treeless new Suburban developments.

The following are outstanding varieties that offer selection of desirable trees to plant for background, framing, shade, ornamental specimens and screens.

APRICOT, Ansu. 12-15 ft. Selection of Siberian Apricot. A dwarf spreading beautiful glossy green foliated tree. Listed here due to its exceptional ornamental value; however it is grafted from trees selected for their good flavored fruit and bearing quality.

Green Ash

ASH, Green Ash. 40 to 50 ft. One of the most popular shade tree in dry, cold climate. Makes a round headed tree with attractive green foliage.

BIRCH CLUMP, European White. 20-30 ft. This multicanne version of the popular white birch is very desirable for its ornamental affect and beauty. Illustrated inside front cover.

BIRCH, European White. 20-30 ft. A graceful, white barked tree of upright form, with medium sized ovalish wedge-shaped foliage. Resembles the canoe or paper birch.

BIRCH, Cut Leaved Weeping. 30 to 40 ft. A very graceful and attractive tree with drooping limbs and delicately cut foliage; silvery white bark. Well branched trees.

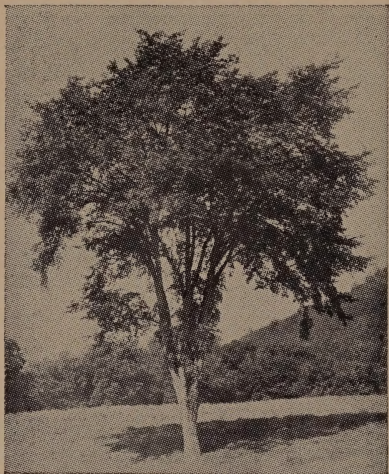

ELM, American. 40 to 60 ft. The popular, gracefully branched, beautiful, noble American tree planted extensively in parkings and general landscape. Moderate grower much less subject to breakage than other Elms.

ELM, Augustine Ascending. 50-70 ft.

New variety receiving wide publicity for its pyramidal habit of growth. Excellent for parkway planting.

ELM, Chinese. 40 to 50 ft. An extremely rapid grower, slender wiry, graceful branches with dense foliage over a long season. The remarkable growth with limited moisture and attractiveness have made it a favorite in the Great Plains region, particularly in arid areas.

ELM, Hybrid. 40-50 ft. Hybrid of American and Chinese elm, rapid growth with large dark green leaves.

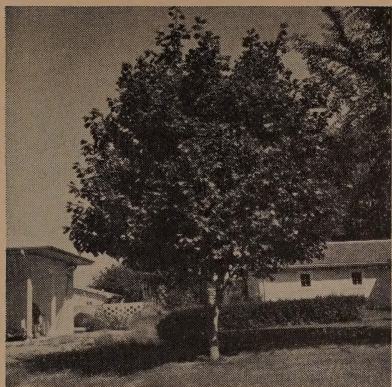

American Elm

HACKBERRY. 40 to 50 ft. Habit of growth is very similar to American Elm. Branches are strong and wiry; tree is remarkably free from insects and disease. A very durable and sturdy tree.

HAWTHORN, Crusgalli Cockspur Thorn.

10-12 ft. A multicanne large shrub or may be grown as dwarf tree. Spreading branches deep green leather-like glossy foliage, brilliant fall color. Bloom clusters of white flowers setting bright red fruit.. Bare Root; 2-3 ft. ea. \$4.25; 3-4 ft. ea. \$6.75; 4-5 ft. ea. \$8.50 Specimen Plants Balled & Burlaped. 3-4 ft. ea. \$13.50; 4-5 ft. ea. \$17.00

HAWTHORN, Washington. 18-20 ft.

Beautiful ornamental tree, creamy-white flowers in large clusters followed by small coral-red fruit. Brilliant autumn foliage. Illustrated above.

HONEYLOCUST, Thornless. 50 ft. We recommend this as the outstanding tree for general planting. Moderate grower, attractive pinnate or fernlike foliage, strong branches are not subject to snow breakage. Resistant to diseases, insect pests. Illustrated inside front cover.

HONEYLOCUST, Thorny. Same as above except for having thorns.

LINDEN, American. 50 ft. A pleasing tree that could well be planted more extensively in many localities. Of moderate growth, rounded to pyramidal in shape; large heart-shaped leaves; fragrant blossoms.

LINDEN CORDATA, Small Leaf Linden. 40-50 ft. Slow growing stocky cone shaped tree. Densely foliated, rich green medium size heart shaped leaves. Trees offered are not as tall for their caliper as the average for other varieties.

LOCUST SHADEMASTER, (Pat. No. 1515) This new variety of thornless honeylocust is especially noted for its straight trunk and ascending branches, producing a symmetrical top. Heavy dark green foliage, pod free.

LOCUST SKYLINE Pat. No. 1619) A stately and unusual variety with distinctive pyramidal form. Similar to Shademaster in foliage, but on occasions it will produce a few blunt thorns on an individual branch.

LOCUST, Sunburst. (Pat. 1313) Bright golden-bronze foliage limited to about 8 inches of branch tips. Free of thorns and pods.

MAPLE, Norway. 40 to 50 foot. Beautiful slow growing closely related to Schwedler Maple with green foliage.

MAPLE, Schwedler, Purple or Red Leaf Maple. 40-50 ft. One of the most attractive Maples in cultivation. As the broad leaves unfold and develop in the spring, the tree is a mass of reddish purple foliage maturing to a dark bronzy green. Pictured inside cover.

MAPLE, Soft. 60 to 80 ft. The fastest growing and largest of the maples. Leaves silvery underneath. This tree is often incorrectly confused with the Silver Poplar which is inclined to sucker.

MOUNTAIN ASH, European. 20-30 ft.

Nicely proportioned ornamental tree with rich green fern-like foliage; bears clusters of white blossoms in late spring succeeded by highly ornamental orange-red berries in fall.

POPLAR Accuminata. Cottonless Cottonwood. 40 to 50 ft. A northern selection with narrower leaves and more shapely growth.

POPLAR, Bolleana. 60 to 80 ft. Beautiful fast growing spire-like, silvery bark and lined, maple shaped leaves.

POPLAR, Lombardy. 50-60 ft. Very rapid, narrow spire-like growth. Branches grow upright close to trunk; leaves green with broad, solid outline. Used for tall screens—formal planting.

POPLAR Sargenti, Plains Cottonless Cottonwood. 50-60 ft. Our native broad leaved cottonwood propagated only from male trees to eliminate the undesirable cotton. Illustrated above.

PRUNUS, Newport. 10-12 ft. A small ornamental tree having a rich cast of reddish purple foliage throughout the season. Large sizes see pricing. 4-5 ft. ea. \$3.75; 5-6 ft. ea. \$4.50

PRUNUS THUNDERCLOUD. 12-15 ft. Quite similar to Prunus Newport. A little larger and broader tree, finer branches, and richer foliage color. Larger sizes see pricing. 4-5 ft. ea. \$4.15; 5-6 ft. ea. \$4.75

RUSSIAN OLIVE. The irregular growth habit and silvery foliage contributes a great deal to landscape decor.

OAK RED. 60-70 ft. An excellent tree. Very slow growing and difficult to adjust to our alkali soils. A beauty where patience prevails.

RUSSIAN OLIVE. 20 to 25 ft. One of the hardier trees. Has narrow silvery foliage and stems; small very fragrant blossoms. Fine for specimens, screens and hedges.

SYCAMORE or American Planetree. 60-70 ft. Large, handsome leaves, smooth, light color bark and neatly shaped tree. Subject to chlorosis in high alkaline soils and possible winter damage.

WILLOW. Niobe Weeping. 30-50 ft. Has very attractive golden bark and long pendulous branches; beautiful in summer and of striking winter appearance.

SHADE TREES

SIZE AVAILABLE AND PRICE LISTING

Trees are generally graded in height up to 8 to 10 ft., next larger grade being 1 1/4 to 1 1/2 inch trunk caliper with height becoming of secondary importance. 2 to 2 1/2 inch tree averages about 12 to 14 ft. tall, all well branched.

Trees can only be shipped Express or Truck Freight.

FLOWERING CRABS

OUR SPECIALTY

Flowering Crabs are becoming very popular as medium sized ornamental trees. Particularly desirable either as specimen trees or group planting in landscaping our modern homes. New introductions adding pyramidal growth and richer color in foliage and bloom increase their potential usefulness. A row of these uprights, as a screen or background, in full bloom almost defies description.

ALMEY. 15-28 ft. Large blossom of glistering red petals, white marking at base giving the effect of a five pointed star. Scarlet fruit retaining till spring. Resistant to fire blight.

DOLGO. 20-25 ft. Very desirable hardy white flowering ornamental. Its bright crimson fruit is unequaled for jellies.

ELEYE. 20-25 ft. Dark maroon barked spreading tree with purplish maroon foliage. Bud deep red opening to rosy pink flowers setting dark red miniature apples.

FLAME. 20 to 25 ft. A very hardy shapely headed tree furnishing a multitude of pink buds opening to large single white blossoms with small bright red fruit. Very resistant to fire blight.

HOPA. 20-25 ft. Most popular Flowering Crab—is well-known for its striking rosy pink flowers, small bright red fruit, bronze-tinged foliage and hardiness.

Illustrated inside front cover.

HOPA, Espalier. Same as regular Hopa but has been trained to grow flat against wall. Very good for open areas such as fireplaces, between windows, etc.

JAY DARLING. 18 to 20 ft. Develops rapidly, red wooded, irregular with purplish green foliage, bright fall color. Blossoms large single purplish-red, sets medium size red fruit.

Dolgo Flowering Crab

KLEHM'S BECHTEL, 12-15 ft. Improved Bechtel being quite dwarf with large attractive foliage that colors bright red in fall. Extra large double pink blooms are fragrant and sterile.

STRATHMORE. 18-20 ft. The pyramidal growth, rosy red bloom lush red tinted foliage and quite small deep red fruit make it outstanding used as specimen or in screens.

WABISKA. 20 to 25 ft. Semi upright in habit, foliage waxy green turning red in autumn, purplish-red semi double flowers, flesh of fruit tinged red, but few fruit.

Additional varieties in stock available B&B or Container Grown; Aldenham, Regular Bechtel, Purple Flowering, Red Silver, Sundog, Transitoria, Zumi.

EVERGREENS

PLANT EVERGREENS FOR SUMMER BEAUTY AND WINTER COLOR

Most important of all is the warm, green cheerfulness of varied foliage textures in the winter landscape when other ornamentals are without foliage or flowers. Summer and winter, Evergreens give an air of friendliness and distinction to any planting.

Scopulorum Juniper

Upright Junipers

These are the pyramidal Evergreens very frequently planted close to buildings, along with low evergreens and shrubs. The outline and height can be and should be influenced by shearing.

We offer Upright Junipers in both Field Grown (B&B) Balled & Burlaped) and Container Grown (CG) stock. The container grown stock being younger, thinner and not as well finished is quoted more economically.

BLUE HAVEN, Scopulorum Juniper. One of the bluest with a little heavier foliage. Trimmed periodically it is one of the most attractive uprights with more resistance to winter injury. B&B Size 1, 2, 3. CG Size 5.

COLO. GREEN, Scopulorum Juniper. A fine textured slender, upright, of bright forest green. An excellent variety. B&B Size 1, 2, 3, 4. CG Size 3, 4, 5.

DEWDROP, Scopulorum Juniper. A very dense foliaged variety that needs little trimming to hold its pyramidal form. Bluish-Green in color. CG Size 2, 3, 4.

MOFFETTI, Scopulorum Juniper. One of the best. Upright pyramidal habit of growth; compact and shapely with very little trimming. Attractive greenish silver color. B&B Size 2, 3, 4. CG Size 2, 3, 4, 5.

PATHFINDER, Scopulorum Juniper. A bluish-silver type, with dense pyramidal habit of growth with flat foliage. Attracts instant attention and highly recommended. CG Size 3, 4, 5.

PFITZER STAKED, Green or Blue.

This version of the popular spreaders trained upright is desirable where a broader less formal evergreen of limited height is needed. CG Size 1, 2.

WELCHI, Scopulorum Juniper. Slower growing compact foliage of quite silvery blue-green color. Pyramidal habit easily retained with minimum shearing. B&B Sizes 1, 2, 3, 4.

Upright Junipers Field Grown B&B

Size 1 4½-5 ft.	Each \$19.50
Size 2 4-4½ ft.	16.75
Size 3 3½-4 ft.	14.75
Size 4 3-3½ ft.	12.50
Size 5 2½-3 ft.	10.50

Upright Juniper Container Grown 5 gal.

Size 1 4-4½ ft.	Each \$13.75
Size 2 3½-4 ft.	12.25
Size 3 3-3½ ft.	10.50
Size 4 2½-3 ft.	9.25
Size 5 2-2½ ft.	7.75

Globe Junipers

LAKEWOOD GLOBE. A selection of Scopulorum Juniper that requires a minimum of trimming to keep in its formal globe form. Bluish Silver in color densely foliaged. Sized by spread.

9-12 in. Each \$6.25; 12-15 in. Each \$7.75.
15-18 in. Each \$9.50; 18-24 in. Each \$10.75

Low Growing Pine

MUGHO PINE. A popular dark green long needled dwarf globe shaped compact pine that adds foliage and form variation to foundation plantings. Size given in spread, furnished B&B and or Container Grown.

15-18 in. Ea. \$10.50; 18-24 in. Ea. \$12.50
24-30 in. Ea. \$14.75; 2½-3 ft. Ea. \$17.25

"PLANT 'EM GROWING

Complete foundation plantings may be installed on the hottest summer day using our container established Evergreens and Shrubs, with no danger of losing a plant; thus, making it no longer necessary to wait from June until the next spring to plant landscape improvements.

We are continually expanding our offering of container established evergreens to include many additional varieties listed on Pages (36-37).

Low Growing Junipers

For Foundations and Border Planting

Junipers are quite an asset to the winter landscape in the Plains Region where most shrubs are without foliage for approximately six months. In addition to their incomparrable value in foundation plantings they make beautiful low informal and sheared evergreen hedges.

Low growing evergreens are measured by the average diameter of their spread and may be furnished in container-established stock or balled and burlaped (B & B) from field.

DWARF GROWING VARIETIES

ANDORA Juniper. A horizontal Juniper with grayish-green foliage turning to reddish purple in early winter making a fine cover 8-10 in. high.

PLUMOSA JUNIPER. Habit of growth is similar to the Pfitzer. Growing slower, it fits beautifully in the more medium size situations. Finer green foliage with blue tint.

TAMARISCIFOLIA Juniper. Dwarf low growing Juniper that ranks as one of the neatest, most attractive in cultivation. A green color that is softened by a blue tone in a densely patterned growth. Little change in color, summer to winter. Also has possibilities for "planter box" planting.

Dwarf growing Varieties Priced B&B or 5 gal.

15-18 in. ea. \$7.50; 18-24 in. ea. \$8.50
2-2½ ft. ea \$10.00; 2½-3 ft. ea. \$12.50

AVERAGE GROWING VARIETIES

BLUE PFITZER. The popular Pfitzer with a beautiful blue tone to a softer foliage, A taller grower.

HETZI Juniper. This silver-blue spreading juniper is one of the hardiest grown. Taller and more sprawling in growth than most.

PFITZER Juniper. A low spreading Juniper, one of the best; foliage attractive rich-green or soft mossy appearance.

SABINA, Juniper. Low growing type with numerous fan-shaped branches, with tufted dark green foliage.

WEAVER JUNIPER. A selection of the popular Pfitzer that is more compact in growth habit and has dense blue-green foliage.

Average Growing Varieties Priced B & B or 5 gal.

15-18 in. ea. \$5.95; 18-24 in. ea. \$7.50
2-2½ ft. Ea. \$9.00; 2½-3 ft. Ea. \$11.50

For additional varieties of low growing Evergreens and alternate sizes available, inquire at the Nursery.

Baby Evergreens

These are the same varieties as described three times transplanted, well-rooted and branched. If immediate effect is not too important they may be quite useful in foundation planting, informal Evergreen hedges and borders or groups. All established in containers. Add 25c each for crating on all express shipments.

ANDORA JUNIPER. Well shaped plants 9 to 12 in. spread.

AUSTRIAN PINE. Average 15-18 in. tall, branched and nicely started.

PFITZER JUNIPER. Nice plants 12 to 15 in. spread.

PFITZER JUNIPER, Blue. Very nice shaped plants. 12- 15 in. spread.

PLUMOSA JUNIPER. Very dense foliage, 12-15 in. spread.

SABINA JUNIPER. Average 9 to 12 inch spread, densely branched.

TAMARISCIFOLIA. Well shaped plants 9 to 12 inch spread. Fine in planters.

COLO. BLUE SPRUCE 9-12 in. Well branched, average blue to green.

Above priced alike in 1 gallon containers
Each Per 3 Per 10 Per 25
\$2.50 \$7.00 \$22.50 \$52.50

BROADLEAF EVERGREENS

Generally not recommended above 5000 ft. or areas exposed to prevailing winds.

EUONYMUS, Fortunei "Sarcocoe". Superior upright vigorous compact plant with lush green leathery foliage on branches that lean tightly toward and up walls.

1 gal. Ea. \$2.50; 5 gal. Ea. \$6.75

MAHONIA, Aquifolium. Oregon Grape (6 ft.) Dark green leathery foliage similar to Christmas Holly with bright yellow bloom in early spring followed by blue-black fruit clusters.

15-18 in. ea. \$8.50; 18-24 in. ea. \$10.00

PYRACANTHA, Wyatti. Firethorn (10 ft.) A semi hardy evergreen of exceptional beauty doing best planted on east. White blossoms in early spring followed by bright orange-red berries in fall.

2-3 ft. 5 gal. \$9.75; 3-4 ft. gal. \$11.50

PYRACANTHA, Espalier, trained on flat trellis.

12-18 in. 1 gal. \$4.65; 3-4 ft. 5 gal. \$19.50

BROADLEAF GROUND COVER

EUONYMOUS, Fortunei Coloratus.

.....Purpleleaf Euonymus semi-prostrate growth. Foliage is deep green turning plum color in fall and winter.

1 gal. \$2.50; 3 for \$7.00; 10 for \$22.50

EUONYMOUS, Radican Argentea Variegata. Variegated Euonymus. Low growing vinelike evergreen with attractive green and white foliage.

1 gal. Ea. \$2.50; 3 for \$7.00; 10 for \$22.50

Pines

Austrian Pine

AUSTRIAN PINE. 40-50 ft. A fine background tree having very good density and color, long rich green needles. Not as drought and wind resistant as Ponderosa but in urban areas develops into a more shapely ornamental.

2½-3 ft. ea. \$11.00; 3-3½ ft. ea. \$13.00
3½-4 ft. ea. \$15.25; 4-4½ ft. ea. \$17.75
4½-5 ft. ea. \$20.00; 5-5½ ft. ea. \$22.50

PONDEROSA. (Bull or Western Yellow Pine.) A native pine with long glaucous needles. Develops into beautiful pyramidal tree. Stands almost unlimited drought. Grows about 12 inches a year. Ultimate height 50-60 ft. Growth and appearance very similar to the Austrian Pine illustrated above. Also see Baby Evergreens. (Price below).

PINON PINE. A slow-growing choice variety. Low round-headed tree, branching from ground. Short foliage of rich warm green, produces delicious edible nuts. Make beautiful specimen trees or ideal tall informal evergreen screens.

Nursery grown specimen priced on selection at the Nursery.

Spruce

COLORADO BLUE SPRUCE. This is

one of the choicest and most beautiful of all evergreens with its symmetrical pyramidal form and color. It is exceptionally well adjusted for wide range of planting and is one of the hardiest.

There is a natural color variation of trees of this species even in seedlings from the same parent tree, and these we classify as Select Blue, Average Blue, and Green color types. Aside from color there is no difference in groups, the contrast between the blues and greens making pleasing combinations. Rate of growth 6 to 12 inches or more per year.

Larger spruce or exceptions to average color or conformation priced according to value upon application or by personal selection. (Special crating if required charged at cost).

Alternate size available in some groups. Inquire at Nursery.

Field Photograph

EVERBLOOMING ROSES

Hybrid Tea Roses

Roses in all their beauty and fragrance can be enjoyed in almost any garden. For best success with Everblooming Roses, good fertile soil, several hours daily sunshine and good thrifty planting stock is required. Where soil is poor, it should be replaced with good topsoil to a depth of 18 to 24 inches for the rose bed. A six-inch mound of soil or leaves over the crown of the plant is a good means of winter protection. In many localities, climbing roses should be laid down for winter and entirely covered. Hardy Shrub Roses need no protection and are not exacting as to soil.

Our list of roses represents a very careful selection in all colors from a great number of varieties. You will find a number of choice new creations of recent years as well as some of the old favorites that cannot be replaced because of their lasting merits.

Finest Western 2 year Top Size Field Grown. Post Paid.

AMERICANA (Pat.) A fragrant glorious and vibrant red. Profuse unfading flowers.

Each \$3.50; 3 or more \$3.20 ea.

HARDY GARDEN CHRYSANTHEMUMS

AN ADDED MONTH OF FLOWERS NOW MAKES INDIAN
SUMMER A MOST COLORFUL SEASON OF
CHRYSANTHEMUMS

Manantico; from 5,500 to 6,500 ft. — most any variety blooming in September or earlier; less than 5,500 ft. — all varieties in this list.

Height of plants when in bloom is stated after each variety. This is for comparison and will vary depending on location, soil, watering. Plants usually grow a little taller the second year. Chrysanthemum plants usually take until May 1st to establish sufficient growth before transplanting. **Priced Postpaid.**

CUSHION TYPE MUMS

Make low plants, broader than tall, covered with solid mass of flowers in full bloom.

ARIKARA (12-14 in.) U.S.D.A. Reddish-bronze with 2½-3 in. semi double flowers borne in profusion. Early Sept. Each 60c; 3 for \$1.50

AUTUMN BEAUTY (12-14 in.) A brilliant sparkling reddish chestnut. A good early bronze. Each 60c; 3 for \$1.50

BRIDGER (12 in. U.S.D.A. No. 55-54 1959 Introduction) Non-fading clear phlox pink blooms of good substance on very hardy fine stemmed plant. Early Sept. Each 85c; 3 for \$2.40

BRONZE CUSHION (12 in.) Low, broad masses of deep bronze shading to rich copper yellow. Blooms constantly from Aug. into Oct. Each 60c; 3 for \$1.50

BUFFALO (10 in. U.S.D.A. No. 55-34 1959 Introduction) Very early, strong stemmed plant having an abundance of clear sunburst bronze blooms from Mid-August on. Each 85c; 3 for \$2.40

CRIMSON QUEEN (10-14 in.) Double red 2 in. blooms aging bronze red on dwarf mound-like plant. Aug. Ea. 60c; 3 for \$1.50

EARLY GOLD. (15 in.) Very early. Bright golden yellow pompom with contrasting dark green foliage. Much more colorful than Yellow Cushion. Late August. Each 60c; 3 for \$1.50

EARLY HARVEST (14 in.) A mass of mahogany-orange flowers. A very good cushion variety. Each 60c; 3 for \$1.50

The varieties here listed have consistently reached mature blooming season here at Loveland where the first light frosts are expected about Sept. 21, and hard frosts conclude the mum season about Oct. 21. Chrysanthemums are resistant to light frosts. The Cheyenne, Wyo., Horticultural field Station (6,100 ft. alt.) has grown many of these varieties and introduced the following varieties indicated as U.S.D.A. We suggest varieties according to altitude as follows: from 6,500 to 8,000 ft. — Roza Bronze and Yellow Cushion, White Gull, Pygmy Gold,

FLICKA (15 in.) U.S.D.A. Mid-Sept.

Flowers are an interesting bronze with rose tints; shape pompom-like, almost entirely double. Each 60c; 3 for \$1.50

GLADNESS. (15 in.) Fully double clear china pink. Early dwarf, hardy and very free flowering. Late August.

Each 70c; 3 for \$1.75

HARVEST BRONZE (15 in.) A rich apricot bronze with a gold undertone. Large 3 in. flowers on a low plant.

Each 70c; 3 for \$1.75

HIDATSA (12-14 in.) U.S.D.A. Really red, double compact 1½ inch blossoms on a dwarf cushion plant. Full bloom in Sept. Each 60c; 3 for \$1.50

NANOOK (14 in.) Compact mound completely smothered by large white flowers with cream center. Early Sept.

Each 60c; 3 for \$1.50

POWDER PUFF (12-15 in.) A new white cushion with 2 inch double open faced blooms produced in typical cushion-type. Late Sept. Each 60c; 3 for \$1.50

ROZA (1952 U.S.D.A. Introduction) (14-16 in.) Standard cushion type. Semi-double 1½ in. flowers of intriguing shade between rose and lavender. Late August. A much better plant and color than Pink Cushion. Each 60c; 3 for \$1.50

SANDRA. (12 in.) Deep bronze color. Non-fading double 2" blooms of lasting quality. Sept. Each 70c; 3 for \$1.75

YELLOW CUSHION. Same type and habit as "Bronze Cushion," but yellow flowers. Each 60c; 3 for \$1.50

WHITE GULL. Baby Pompon of compact low growth producing quantities of small rounded one-inch white button mums. August. Each 60c; 3 for \$1.50

SEMI-DWARF AND LARGER CUSHION

ADORABLE (16-18 in.) This new pink has everything, large flower, early and dependable clear bright rose pink with salmon reverse. **Each 70c; 3 for \$1.75**

APACHE (18 in.) Large, shaggy, golden bronze 3 to 4 inch double blooms with curled petals. Late September. **Each 70c; 3 for \$1.75**

ARAPAHOE (16 in.) USDA. 2 in. semidouble Indescribable colors, being a blend of bronze, yellow and reddish orange. Early Sept. **Each 60c; 3 for \$1.50**

AYALANCHE (18 in.) Very popular large white cream center. Sept. **Each 60c; 3 for \$1.50**

CREAM AVALANCHE (18-20) Kroh Bros. Introduction for 1952! A very lovely Avalanche sport. Early large fluffy rich cream colored 4 in. blossoms, Mid Sept. **Each 70c; 3 for \$1.75**

CRYSTAL MAID (16 in.) Clear sparkling white, broad plant, good for borders. **Each 60c; 3 for \$1.50**

DELUXE RED CUSHION (18 in.) Has "Azaleamum" type of double blossoms and mound-like growth habit slightly more robust in size. Color definite red. Early Oct. **Each 60c; 3 for \$1.50**

DR. LONGLEY (18 in.) New Longley origination. Fully double, large bright rose-pink. One of the more popular varieties among our visitors. Early Sept. **Each 60c; 3 for \$1.50**

EARLY WHITE (18 in.) Extra-early clean cream-white. Fine texture with clear coloring. August. **Each 60c; 3 for \$1.50**

EDNA ROWLEY (18-20 in.) Lavender pink, ruby centered pompon flowers cover this mound shaped plant. Excellent for cut flowers. Early Oct. **Each 70c; 3 for \$1.75**

FOOTBALL BRONZE (24 in.) An early large flowering, incurved soft bronze. Strong healthy plant. Sept. **Each 60c; 3 for \$1.50**

JOAN HELEN (18-20 in.) Semi-double sparkling garnet-like shading to purple; bright yellow center. Sept. **Each 60c; 3 for \$1.50**

LESHARA (18 in.) Great mounds of double, showy red blooms on a solid non-fading border. Sept. **Each 60c; 3 for \$1.50**

LIPSTICK (16-18 in.) A grand, bright mound of sparkling crimson-red double flowers on a compact plant with very good foliage. Late Sept. **Each 70c; 3 for \$1.75**

LORENZO (18-20 in.) Double rich dark Dianthus purple. Quilled petals. Early Sept. **Each 60c; 3 for \$1.50**

MANANTICO (16 in.) USDA. Single 2 1/4 in. flowers. Shoenfeld purple on inside, rosaline pink on back side; bright yellow disc. **Each 60c; 3 for \$1.50**

MAVERICK USDA No. 55-4 1959 Introduction 15 in.) 2 1/2 in. flower of magenta purple with lighter reverse, on strong upright stems. Early Sept. Very hardy. **Each 85c; 3 for \$2.40**

MINNIPINK (16 in.) Compact, gorgeous color of clean rose-pink. Sept. **Each 70c; 3 for \$1.75**

ORSONA (18-20 in.) Red bronze decorative bushy cushion growth habit, good foliage covered with 2 double blossoms. Early Oct. **Each 70c; 3 for \$1.75**

OSTOSA (18 in.) A top notch new pure white pompon semi dwarf plant. Free blooming and early. **Each 70c; 3 for \$1.75**

PATHFINDER (18 in.) A new distinct carnation type bloom of rich golden-yellow. **Each 60c; 3 for \$1.50**

PLAINSMAN (18 in.) Flower and plant same as Pathfinder. Color a rich bronze ageing to a lighter bronze-yellow. **Each 60c; 3 for \$1.50**

POHATCONG (18 in.) Double 2 1/4 flowers. Outer ray petals have a white face, edged and streaked hermosa pink with reverse white. Late Sept. **Each 60c; 3 for \$1.50**

PYGMY GOLD (15 in.) a dwarf pompon with steady succession of 1 inch golden blooms from August till hard frosts. **Each 60c; 3 for \$1.50**

SALUTE (18 in.) A striking rich purple that certainly attracts the attention of all our visitors. Late Sept. **Each 60c; 3 for \$1.50**

SAN SABA (USDA No. 55-9 1959 Introduction 15 in.) Very early, sulphur yellow ageing to slight lavender. Strong plant, developing 2 1/2 in. blooms in late August. **Each 85c; 3 for \$2.40**

SANTA CLAUS (24 in.) Broad mound bearing rich red blossoms. Flowers large, 2 1/2 in. almost double. Very showy. Late Sept. **Each 60c; 3 for \$1.50**

SEPT. BRONZE (15 in.) The warm bronze and golden bronze tints of Autumn are beautifully reflected in 1 1/2 inch pompon. **Each 60c; 3 for \$1.50**

SEPT. CHEER (14-16 in.) Very unusual bright pink, double, very showy. **Each 70c; 3 for \$1.75**

TASIVA (16-18 in.) Beautiful 2 1/2 in. double white with delicate cream center. Sept. **Each 60c; 3 for \$1.50**

TECUMSEH (15 in.) Opens erthrite-red, aging to buffy bronze with pink edges. Cushion growth. **Each 60c; 3 for \$1.50**

TOGWOTEE (USDA No. 55-93 1959 Introduction 18 in.) 2 1/2 in. clear chrysanthemum red blooms of carnation type on very strong upright plant. Non fading, early Oct. **Each 85c; 3 for \$2.40**

INTERMEDIATE AND TALLER

ASPEN GOLD (26 in.) Kroh Bros. 1948. Opening semi-double 2 1/2 in. blossoms, golden yellow blend-orange shades. Sept. **Each 60c; 3 for \$1.50**

AUTUMN RAY. Kroh Bros. Introduction 1951 18 in.) A very prolific 1 1/2 in. pompon yellow flowers, first with slight orange bronze shading, maturing to lemon yellow. Late Sept. **Each 60c; 3 for \$1.50**

BIG HORN USDA No. 58-12 Introduction (20 in.) 2 1/2" flowers are fully double, high crowned, clear orchid pink, well formed upright plant. **Each 85c; 3 for \$2.40**

CANARY WONDER (24 in.) Light lemon-yellow pompon, very double, strong stems. **Each 60c; 3 for \$1.50**

CHARLES NYE (24 in.) A double broad petaled 2 1/2 in. deep golden yellow. Late Sept. **Each 60c; 3 for \$1.50**

CHIPPewa (22 in.) Minnesota introduction of striking aster like purple. 2 3/4 in. blooms. Double to semi-double. Sept. **Each 60c; 3 for \$1.50**

CHRIS COLUMBUS (24 in.) Shapely double two inch blooms of uniform petalage nicely displayed. Color ivory white. Late Sept. **Each 60c; 3 for \$1.50**

CROWNING GLORY (22 in.) Double extra large rich bronze-gold borne on strong nicely foliated plant. Late Sept. **Each 70c; 3 for \$1.75**

DELIGHT (22 in.) Large perfect flower of golden yellow. A very good early yellow. **Each 60c; 3 for \$1.50**

TALLER MUMS—Continued

DESERT MOON (20 in.) Kroh 1957 Introduction.

Deep rich lemon yellow. Very double 2 in. bloom produced on good stem for cutting. Each 60c; 3 for \$1.50

(ANNUALS)

BEDDING PLANT HEADQUARTERS

During the Bedding Plant planting season we have a very comprehensive selection, both in varieties available and size of plants. All are out-door grown thus toughened to take transplanting to your out-door beds without faulting.

Economically priced according to plant size and variety and availability at the Nursery.

PLANT 'EM GROWING CHRYSANTHEMUMS

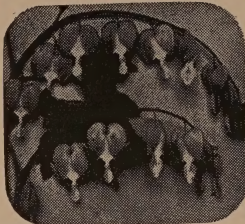

We have over 100 varieties of chrysanthemums totaling over 5000 plants available approximately Aug. 15th so you can pick just the color and size desired for that color boost late in the fall, when frost has deterred other flowers. **85c ea. 10 (any combination) for only \$7.75**

PERENNIALS

ONCE PLANTED WILL CONTINUE TO BLOOM
 YEAR AFTER YEAR

Most Perennials require an open, sunny situation to thrive and show at their best. Soil should be well drained rich garden loam, and enriched each year with an application of well rotted manure used as a mulch in the fall. Apply the mulch after the ground is frozen.

Prices of Perennials, unless otherwise indicated.
60c ea.; 3 alike for \$1.50; 6 alike for \$2.85;
12 alike for \$5.50. Postpaid

Bleeding Heart

BABY BREATH. Bristol Fairy. (2 ft.) Large panicles purest white double flowers. 2 yr. No. 1. **Each \$1.10**

BLUE HILLS. Light blue flowers. Compact plant.

EMERALD CUSHION. Beautiful foliage, rich pink flowers.

SAMPSON. Lavender flowers, not as evergreen.

Be sure to check on page 38 for many additional varieties of perennials.

PLANT 'EM GROWING

Container established stock that is available throughout the year.

In just ten years the popularity of "Plant 'Em Growing" container established or container grown plants has increased tremendously. The now proven dependable performance in planting "Plant 'Em Growing" stock in any season is fast eliminating the belief that Landscape Planting could only be successfully done in the Spring. Our production has expanded from a few potted Roses to presently include a very diversified list of horticulture varieties available in a wide range of sizes even to include large specimen trees. Krohs thousands of "Plant 'Em Growing" plants in full foliage affords an opportunity of variety appraisal and personal selection unobtainable a few years ago.

The increased cost of "Plant 'Em Growing" stock required to recover the expense of container, potting, and maintenance becomes insignificant in view of the value received. The faultless transplanting and uninterrupted growth without the necessity of reducing plant size by pruning increases their immediate effect and value. The fertile scientifically blended soil used in our containers contributes much by sustaining the plant in good health while it makes necessary physical adjustments to its new environment.

"Plant 'Em Growing" container stock is more difficult to ship or haul than the dormant plants listed on the preceding pages. It cannot be mailed Parcel Post. For shipping instructions please refer to Crating & Shipping Charges on page (1). We suggest that whenever possible "Plant 'Em Growing" plants should be called for at the nursery and if the larger trees or containers are desired a pickup or trailer be used, if available. Local one-way rental trailers are available if needed.

FRUIT TREES

Fruit trees are established in 5 gal. containers with the tree size given in trunk caliper. Growth appreciation and sales are constantly changing stock availability so at any given time our supply may not include all sizes quoted.

APPLES

Varieties, described page (2). Dark Red Delicious, Jonathan, Haralson, McIntosh, Yellow Delicious, Red June, Yellow-Transparent, Whitney Crab, Joyce, Wealthy.

EASY AND SIMPLE PLANTING INSTRUCTIONS

By following the instructions illustrated below, even the most inexperienced gardener can accomplish a professional job of planting. With these simple planting requirements and reasonable growing conditions, successful continued growth without wilt or loss of bloom may be expected.

FIBER CONTAINERS ARE EASILY REMOVED BY SPLITTING SIDES WITH POCKET KNIFE. METAL CONTAINERS ARE SPLIT DOWN TWO SIDES BEFORE LEAVING NURSERY.

METAL CONTAINERS ARE REMOVED BY LOOSENING SIDES & BENDING AWAY FROM ROOT BALL. REMOVE PLANT BY LIFTING BALL WITHOUT BREAKING UP SOIL.

CAUTION: DO NOT BREAK OR CRUMBLE SOIL ROOT BALL!

1. DIG & TEST HOLE SIZE & DEPTH BEFORE REMOVING CONTAINER. BE SURE GRAFT ON ROSES IS LOCATED ABOUT 2" BELOW SURFACE

2. REMOVE CONTAINER CAREFULLY & SET PLANT IN HOLE.

3. FILL AROUND BALL WITH GOOD SOIL GENTLY & FIRMLY PACKED.

4. LEAVE SOME SPACE TO HOLD WATER & SOAK THOROUGHLY.

5. AFTER WATER SEEPS AWAY, FINISH FILLING WITH SOIL.

*Varieties not listed in descriptive catalog.

Plant 'Em Growing Roses

Our "Plant 'Em Growing" Roses, with a few exceptions are not sufficiently established in their containers for successful transplanting until after May 20th—June 1st. The (*) varieties available only in potted stock and are not described on Page 19-23. These are offered to give our customers the most extensive listing available from which to make your selection. "Plant 'Em Growing" Roses **cannot** be mailed parcel post. Please refer to Packing and Shipping instructions, Page (1).

Shade and Ornamental Trees

The varieties preceded by (*) are additional selections offered in "Plant 'Em Growing" container stock, and are not described on pages 12-15 like the other varieties. Trees are established in 5 gal. containers for the smaller sizes; with the larger caliper size trees in containers up to 30-40 gal. Shipment of the larger caliper trees is generally not recommended. All Shipments must go by Express or Truck Freight.

Sizes given in feet means height. Larger tree sizes given by inch trunk caliper.

CLIMBING VINES

Varieties not preceded by (*) are described on page (24)

Variety	1 gal.	5 gal.
*Bittersweet		\$2.75
Boston Ivy	\$1.95	
Clematis, Crimson Star	2.75	
Clematis, Henryi	2.75	
Clematis, Jackmanni	2.75	
Clematis, Ramona	2.75	
Engleman, Ivy	1.85	2.45
*English Ivy	1.95	
*Euonymus Vegetus	2.50	
Honeysuckle Dropmore	1.85	2.45
Honeysuckle, Gold Flame	1.85	2.45
*Honeysuckle, Scarlet Trumpet	1.85	2.45
Silverlace Vine	1.95	2.65
*Trumpet Vine		2.95
Grape Vines (See Small Fruit)		
Vining Roses (See Climbing Roses)		

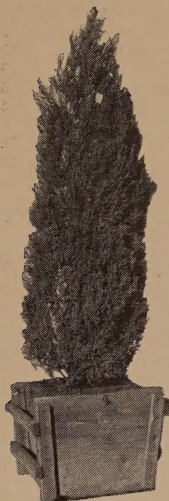

PEONIES

"Plant 'Em Growing" peonies even though many won't bloom the first spring give the opportunity to gain time and growth either in home plantings or planting in Cemetery. Following available until sold out.

Variety	Color	1 gal.
*Avalanche, large cream-white		\$1.95
*Big Ben, Double Red, medium		1.95
*Eduis Superba, fragrant, light pink		1.60
Felix Crousse, bright red		1.85
Festiva Maxima, white, red flecking		1.85
*Karl Rosenfield, deep red		1.95
*Laura Dessert, new yellowish cream		2.25
*Longfellow, most popular dark red		1.95
*Marie Lemoine, new pure white		2.00
*Mon Jules Elie, dark pink		1.75
*Mrs. Roosevelt, new delicate pink		2.25
*Officinalis Rubra, Memorial Day red		2.25
*Philomele, pink-lavender and yellow		2.25
*Riene Hortense, large pink		1.95
Sarah Bernhardt, appleblossom pink		1.75
*Therese, very double large pink		2.15

Evergreens

The "Plant 'Em Growing" container-established innovation for supplying nursery stock has greatly expanded the use of Evergreens in home landscaping. A large percent of the smaller and medium size plants are now grown from infancy in the containers thus removing almost entirely the risk of transplanting shock or loss. The larger specimens available are balled from the field at the most opportune transplanting time, and planted in the larger containers (illustrated) for summer or off season planting. This increases production costs requiring an increase in price, but removes the risk of possible inconvenience and disappointment in their unsatisfactory continued growth. Varieties preceded by (*) are not described on pages 16 thru 18.

Specimen Upright Juniper established in box for summer planting.

Upright Junipers

The Upright Junipers, illustrated, are all priced alike according to their height and container size. The principal variation between varieties is their color and foliage texture.

Variety	Color	Sizes		
BLUE HAVEN	Silver-Blue	1, 2, 3, 7, 8, 9		
COLO. GREEN	Forest Green	2, 5, 7		
*COLUMNARIS	Blue-Green	4, 5, 6, 9

Inspiration, pink	2.25
Paul's Scarlet, red	2.25
Spectacular, orange red	3.25

SHRUB ROSES

Austrian Copper, yellow & red ..	2.75
Grootendorst, red	2.15
Harrison's yellow, yellow	2.75
Pink Grootendorst, pink	2.65

TREE ROSES

Beautiful. Have to be protected by special care to stand our winter conditions.

Variety & Color	5 gal.	Redwood
Charlotte Armstrong, red	8.25	12.25
Chrysler Imperial, red	8.25	12.25
Circus, yellow bicolor	8.25	12.25
Crimson Glory, red	8.25	12.25
Peace, yellow and pink	8.25	12.25
Queen Elizabeth, pink	8.25	12.25
Tiffany, pink	8.25	12.25

Perennials

We take pride in offering one of the most extensive listings of perennials in the Rocky Mountain region. Many customers not familiar with perennials names have been able to select the varieties they were seeking by recognizing the plants and foliage growing in containers. Perennials are established and growing in 1-gal. containers suitable for planting anytime throughout the summer and fall. Unless otherwise noted, **85c each, 10 for \$7.75**

*AGERATUM, Hardy, blue, fall
 *ANTHEMIS, Kelwayi, yellow, summer
 ASTER
 @Dark Beauty, dwarf, dark blue
 *Wartburg Star, dwarf, lilac blue
 White Lady, pure white, fall
 BABY'S BREATH
 *Bristol Fairy, double white \$1.60
 *Pink Fairy, double, bright pink \$1.60
 #BASKET OF GOLD, Bright yellow
 #BEARD'S TONGUE, dwarf, clear pink 95c
 *BELLFLOWER, compact, blue
 BLEEDING HEART
 *Old Fashioned, \$1.60 & up
 BUGLEWEED
 @Genevensis, blue, May-June
 @Reptan Rubra, purple, May-June
 CANDYTUFT
 #Sempervirens, white, spring
 #Persian, bright pink, spring 95c
 CANNA PFITZER'S, dwarf
 #Cherry Red, flashing cherry red 95c
 #Chinese Coral, bright fresh pink 95c
 #Primrose Yellow, clear true yellow 95c
 #Salmon Pink, luminous buff to salmon 95c
 CARNATION
 *Cardinal, bright scarlet
 *King of Blacks, dark maroon
 *Fine Mixture, mixed
 COLUMBINE
 *Mrs. Scott Elliott, Hybrids, mixed
 *Crimson Star, striking crimson
 #Rocky Mountain, blue & white
 *COREOPSIS, golden yellow
 CUP & SAUCER, light blue
 DELPHINIUM
 *Belladonna, old fashioned light blue
 *Bellamosa, old fashioned, dark blue
 DELPHINIUM HYBRIDS \$1.10 ea.
 *Black Knight, dark purple, black bee
 *Blue Jay, dark blue, black bee
 *Galahad, pure white, white bee
 *King Arthur, dark purple, white bee
 *Summer Skies, light blue, white bee
 #DWARF LACE PLANT, dark green foliage
 *DUSTY MILLER, scarlet, maltese cross flower
 *FALSE INDIGO, deep blue
 FERN, Ostrich Plume 85s & up
 GAILLARDIA
 #Baby Cole, dwarf, red, yellow edges 95c
 *Burgandy, deep wine red
 *Grandiflora, gold-crimson
 *GARDEN HELIOTROPE, soft pink
 *GAYFEATHER, Kobalt blue (blue spires)
 *GAYFEATHER, Silver Lace, (white spires)
 #GERMANDER, Carmine-rose, borders
 GRASSES
 @Festuca Glauca, grayish blue
 *Pampas, tall graceful plumes 95c
 *Plume, plumes, winter bouquets 95c

HARDY PINK
 *Old Spice, salmon pink 95c
 *Semperflorens, pink everblooming
 *Wallace Red, semi-double, bright red 95c
 *Winteri, dollar size, single white
 HERBS
 @Chives, meat flavoring 95c
 @Sage, meat flavoring 95c
 @Sage, meat flavoring 95c
 @Thyme, meat flavoring 95c
 *KNAPWEED, fine purplish-red novelty 95c
 *LILY, Regal, pure white, yellow throat
 *LEADWORT, deep blue, all summer
 #LILY OF THE VALLEY, pure white, shade
 *LUPINE, hardy, spikes of mixed colors
 *LYTHRUM, M. Gleam, rosy-pink spikes
 *PAINTED DAISY, mixed colors
 #PHLOX, Hardy
 *Adonis, brilliant intense crimson
 *Boulevardier, large, rose-violet 95c
 *Comus, large orange red
 *Early Gem, salmon pink, red eye
 *Elizabeth Arden, dwarf, light pink, red eye
 *Everest, pure white, red eye .95
 *Flash, beautiful, crimson red
 *Hauptman Koehl, dark blood red
 *Mary Louise, purest white
 PHLOX SUBULATA, Creeping
 #Blue Hills, light blue
 #Emerald Cushion, bright, prolific pink
 #Sampson, light pinkish lavender
 #White Delight, enormous heads, white
 #PLANTAIN LILY, green-whiteleaves lilac
 *RED HOT POKER, red top, gold lower pedals 95c
 *SCABIOSA, lavender, all summer
 STATICE, SEA LAVENDER
 *Latifolia, lavender baby's breath
 *Dumosa, silver-gray flowers
 SEDUM
 Acre, golden moss, yellow flower
 @Hen & Chicks, rose, pink, red, yellow
 #Dragons Blood, very dark red
 #Sexangulaire, hardy, yellow
 #Spurium, free flowering, deep red
 #Ternatum, pure white
 *SANTOLINA, gray foliage, borders
 *SHASTA DAISY, Marconi, semi-double
 *SILVER KING, 18" silver foliage 95c
 *SILVER MOUND, 6" silver foliage
 SPURGE, yellow, May-June
 SWEET WILLIAM
 #Midget, very colorful, mixed
 #Tiny Rubies, dwarf, carnation, rose pink
 #THRIFT, bright, pink, June
 *VERONICA, bright blue spires
 WINDFLOWER
 *September Charm, silver pink, fall 95c
 *Queen Charlotte, semi-double pink, fall 95c
 *YARROW, soft rose, all summer

Varieties marked (*) are good for cutting (#) Rockeries (@) Ground cover

Western Grown for Western Planting

The Rocky Mountain and Plains region comprise a distinct climatic area in that the higher altitude, limited rainfall, sudden temperature change, and the length of the growing season have a definite influence on plant growth. Evaporation of moisture from plants is high and they must have a more highly developed root system to maintain a normal growth balance. Bark and wood cells also build up resistance to atmosphere and temperature.

Some varieties that do well in lower, more moist climate will not adapt themselves to our growing conditions, and so cannot be considered. Fortunately, however, there are many varieties that have proven their adaptability here, and others are being tried and observed to enlarge the list of plant material especially suited to growing condition in this area, both in fruit and ornamental stock. We take pride in participating in the leadership in testing plant material and bringing new proven hardy items to our western trade so that our customers may have the best nursery stock obtainable.

The viability of dormant plants, like the freshness of vegetables, is subject to rapid deterioration under inadequate storage facilities and inexperienced handling. Our facilities and many years of experience assures our customers the delivery of hardy, healthy and viable nursery stock.

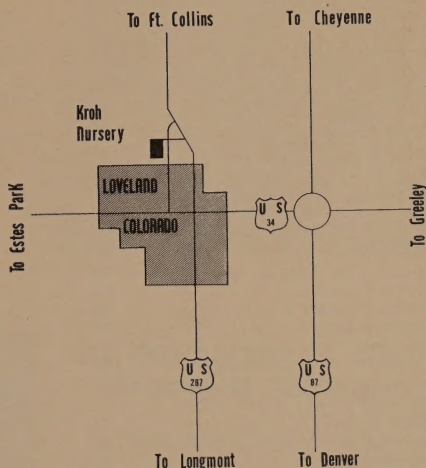

There can be only one conclusion in obtaining the greater value in your purchase of nursery stock; if it is acclimated, correctly grown and properly handled you will realize the maximum results in transplanting: if the varieties are adapted you may expect a successful continued growth.

Our Location

OUR LOCATION: One mile north on highway 287 from junction of highways U.S. 287 and U.S. 34 — Office and display yards one block west of highway. We are centrally located in the highly productive agriculture area of Northern Colorado, and within the fruit growing section of the Eastern Slope. Nursery stock in various stages of development can be seen in our fields throughout the year.

NATIONAL ENDORSED ROSES

Consumers Reports magazine with national circulation, designates Kroh Brothers Nurseries as one of a select number of firms in the United States to be a consistently good and reliable sources for roses. We are proud to have our roses merit this unsolicited recognition.

"WHERE OUR CUSTOMERS SEND THEIR FRIENDS"

Our annual list of nursery stock is being sent to an increasing number of interested home owners, either by virtue of new requests, or as a result of current patronage. We are glad to send it to you and are especially grateful to those who have recommended our stock to their friends.

See Page 1 for Terms of Sale and Guarantee

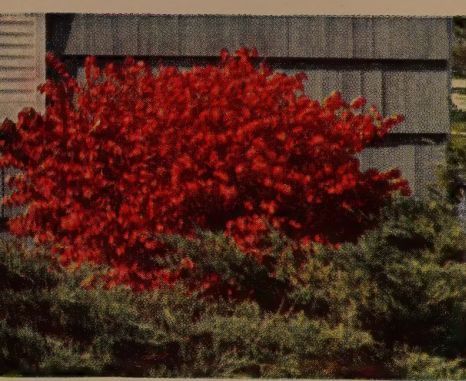

Index

The **Dormant Stock** page reference column is a guide to plant description and size available for stock deliverable in early Spring in a dormant growth condition. Dormant plants should be the first considered where the planting can be done before they start growth about May 20th.

The **"Plant 'Em Growing"** page reference column is a guide to plant size available in the container-established growing stock. Several varieties of the "Plant 'Em Growing" stock are insufficiently developed prior to June 1st (some later) to be ready for transplanting before June. As they become adequately established in their containers "Plant 'Em Growing stock may be delivered and planted anytime during the year.
